

ONLINE FORMS

A highly efficient & cost effective way to collect information from volumes of people directly from a form opened in a desktop, laptop or mobile device browser

Build, brand & distribute forms in minutes

Thanks to our easy to use drag & drop form building interface creating a new form can take only a few minutes.

Simply add the appropriate fields and rules to make sure you get back the data that you need.

Add a 'theme' to the form with your logo, house colours and contact details and you are good

Collect data from anyone, anywhere at any time

Each form you build will generate a unique link, which when clicked will open your form in the browser of the device they are using - desktop, laptop or mobile.

All that is needed is an Internet connection & browser on the device used for

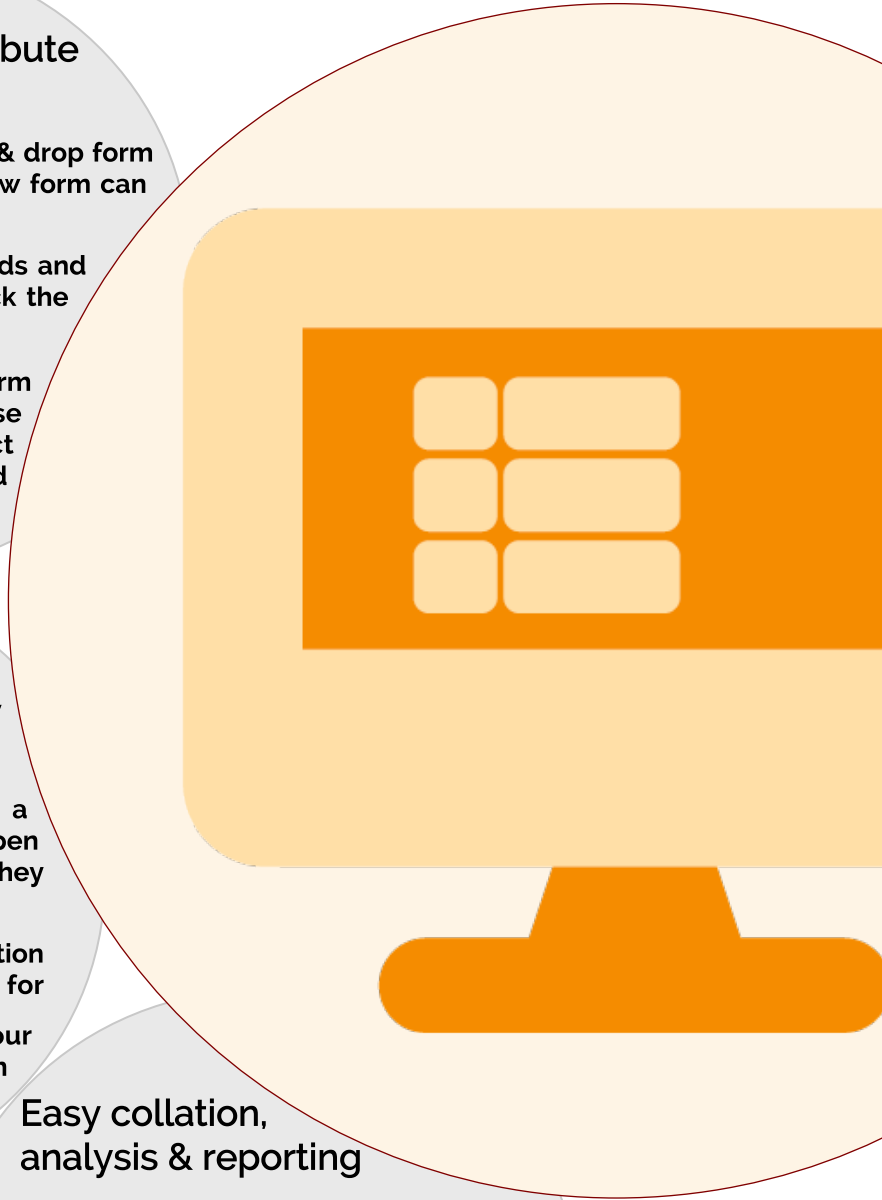

Alternatively you can make your form available by adding it to an iframe on your company

Easy collation, analysis & reporting

Once your form link has been made available to your target audience they can start to complete & submit forms.

You have full control over the message they receive, whether a copy of their submission is emailed back to them as well as who is notified of a submission inside your own business.

Custom reports then help you collate and report on the data received.
