pro-Forms® dramatically cuts administration time and cost

The Company Located in Bromsgrove, Worcestershire, ASAP Fire Systems operates a team of engineers attending jobs on a national basis. As well as a growing list of direct customers, ASAP also undertakes work on behalf of other fire & security companies, completing different forms and paperwork as required by those they are working for.

“Improved communication with customers and engineers, efficiency gains and same day invoicing - all from using pro-Forms® - simply brilliant!”

The Solution A range of industry standard forms used by engineers forms were created using pro-Forms® covering the needs of Clients ranging from sprinklers, fire hydrants, bin store deluge systems and Dry & Wet Risers. The office Sage Accounts50 installation was integrated into pro-Forms® using the pro-Connector® app so making customer addresses, sites and contacts available to staff when raising and dispatching jobs to engineers’ devices via pro-Forms® ASAP can now demonstrate high standards of inspection compliance on completed documentation for Clients given the recent increase in scrutiny of the Industry.
