Two staff posts re-deployed[®] from savings with pro-Forms[®]

The Company The Building Safety Group (BSG), the UK's largest construction safety group rely on their safety advisers capturing high quality data including images and signatures at each site and workshop visit. Office staff handled up to 35,000 audits and assessments each year and the company had a huge financial weight on postage and administration. With 50 years of experience, BSG were seeking innovative methods of data collection without disrupting the quality.

“pro-Forms[®] has allowed us to re-deploy 2 full-time staff”

The Solution pro-Forms[®] built an easy to use custom site audit form with highly visual output for the BSG Safety Advisers to use with their Android smartphones when visiting Member sites. Within only a few minutes office staff now receive each audit into the main office management system for checking and onward emailing to Members. This new and efficient process reduced BSG staff admin time previously used to handle paper audits and re-type the data. Member companies likewise benefit through receiving up to date information on their sites the same day of the audit.

www.pro-Forms.co.uk

Key Benefits

- 100,000 **documents eliminated** and replaced with electronic forms
- 2 full-time **staff positions re-deployed** with a focus on revenue generation
