TAKE CONTROL OF YOUR OPERATIONS

One platform to schedule work, manage assets and keep every job moving - whilst being paper free

THE Problem

Across many organisations, critical processes are still managed through a mix of paper forms, spreadsheets and disconnected systems.

Work is completed in the field, but information is delayed, inconsistent or difficult to access. Jobs are managed separately from asset records. Data is captured multiple times. Reporting becomes time-consuming and unreliable.

As operations grow, these inefficiencies scale.

Without a structured approach, organisations struggle to maintain visibility, demonstrate compliance and make informed decisions.

A man with a beard, wearing a white long-sleeved shirt, is standing in an office environment. He is holding a tablet computer in his right hand and pointing at it with his left hand. The background shows office furniture, including a desk and a chair, and a window with blinds. The lighting is bright and even.

Disconnected Processes
Create Hidden Inefficiencies

THE Platform

pro-Forms® brings together field service management, asset tracking and structured data capture into a single, configurable platform.

It connects office teams, field engineers and external users - replacing paper processes and disconnected tools with a more structured and reliable way of working.

ENTERPRISE ASSET MANAGEMENT

Track, manage and maintain your assets

FIELD SERVICE MANAGEMENT

Plan, schedule and control work in the field

MOBILE FORM BUILDER & APP

Capture accurate data wherever work happens

ONLINE FORM BUILDER

Collect structured data from any user, anywhere

How it all connects

**EXTERNAL USERS/
CUSTOMERS**

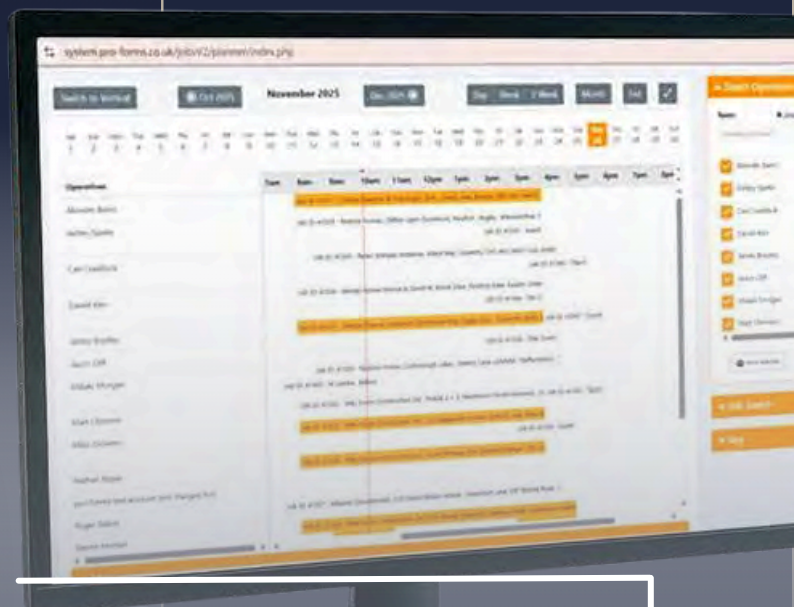

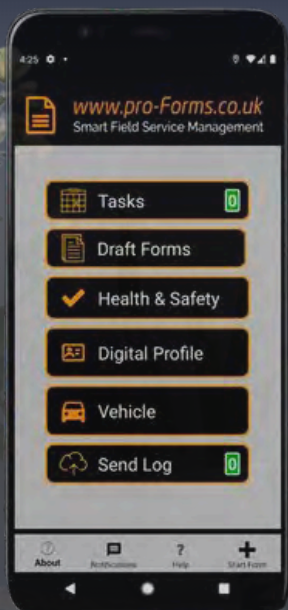

**ONLINE PLATFORM
BUILDER**

**MOBILE FORMS, WORK
MANAGER, ENTERPRISE
ASSET MANAGER**

**OFFICE TEAMS/
MANAGEMENT**

One Platform.
Endless Capabilities.

ENTERPRISE

Asset Management

ENTERPRISE ASSET MANAGER

ENTERPRISE ASSET MANAGER provides a centralised system for tracking and managing assets across their lifecycle.

It enables organisations to maintain accurate records, link work activity to assets and gain full visibility of performance, history and compliance.

Best suited to:

Asset owners, building occupiers, equipment manufacturers (OEMS), asset managers and surveyors.

KEY CAPABILITIES:

Centralised asset register

Asset history, servicing and compliance records

Location and hierarchy tracking

Link jobs, forms and inspections to assets

Reporting and audit trail

Know What You Own.
Understand How It Performs.

FIELD

Service Management

WORK MANAGER

WORK MANAGER enables organisations to plan, schedule and manage jobs efficiently, from initial request through to completion.

It brings structure to field operations while providing real-time visibility of work in progress.

Best suited to:

Facilities management, contractors, maintenance providers, utilities and service-based businesses.

KEY CAPABILITIES:

Job creation, scheduling and allocation

Quote generation and job tracking

Recurring maintenance and planned work

Real-time status updates from the field

Job history and reporting

Plan and Deliver
Work with Greater Control

MOBILE FORM

Builder & APP

MOBILE FORM BUILDER & APP

The MOBILE FORM BUILDER & APP enables teams to complete structured forms on mobile devices, replacing paper-based processes.

Forms are designed to capture exactly the information required, ensuring consistency across teams and sites.

Best suited to:

Engineers, inspectors, technicians and any team working on-site or remotely.

KEY CAPABILITIES:

Drag-and-drop or AI-assisted form builder

Capture images, signatures and structured data

Works offline in field environments

Generate outputs in PDF, Word or Excel

Integrates with wider systems

Capture Accurate
Data in the Field — First Time

ONLINE

Form Builder

ONLINE FORM BUILDER

The ONLINE FORM BUILDER enables organisations to create secure, branded forms accessible via browser, QR code or link.

It extends data capture beyond internal teams, allowing information to be collected directly from customers, suppliers and stakeholders.

Best suited to:

Customer ordering, onboarding, HR applications, compliance submissions and data collection processes.

KEY CAPABILITIES:

Share forms via links, QR codes or embedded pages

Fully branded and configurable forms

File uploads and mandatory fields

Secure data capture and storage

Integration with internal systems

Collect Structured
Data from Any User, Anywhere

CASE STUDIES

pro-Forms® is used across a wide range of industries to improve visibility, reduce administrative effort and bring structure to complex operations.

From customer-facing online forms to large-scale field service deployments and asset management systems, organisations use pro-Forms® to replace manual processes and gain control of their data.

The examples below show how different parts of the platform are applied in practice.

A worker in a hard hat and safety vest looking out over an industrial site.

Proven Across Real
Operational Environments

CUSTOMER:

Datomic Services Ltd

SECTOR:

Specialist Engineering

THE CHALLENGE:

As the business grew, job records and asset information became fragmented and difficult to manage.

THE OUTCOME:

THE SOLUTION:

Clearer job organisation

Implementation of **WORK MANAGER** and **ENTERPRISE ASSET MANAGER**:

Improved asset visibility

Structured job planning and tracking

Centralised, consistent records

Linked asset records and history

Scalable operational control

From Fragmented Records to Full Operational Control

CUSTOMER:

Hortec Grow with Technology Ltd

SECTOR:

Agricultural Engineering

THE CHALLENGE:

Hortec needed a more efficient way to manage service jobs without relying on paper-based processes, reducing admin time, eliminating duplication, and improving visibility across engineering and office teams.

THE OUTCOME:

THE SOLUTION:

Faster job processing with real time data capture

A digital job management solution using WORK MANAGER:

Elimination of paperwork and manual admin tasks

Mobile job sheets completed and submitted on-site

Improved stock control and parts availability

Real-time capture of job and parts data

Greater accuracy with no handwritten errors

Flexible forms with integrated reporting and stock visibility

Turn Every Job Into a Real-Time, Paper-Free Process

CUSTOMER:

Paterson Safety Anchors Ltd

SECTOR:

Manufacturing

THE CHALLENGE:

Paterson needed a flexible system to support their specialised services, replacing paper-based reporting and improving visibility without forcing their processes into rigid software.

THE OUTCOME:

Automated PDF reports generated and sent from site

Significant reduction in admin and manual processes

Improved operational insight through detailed reporting

A scalable system supporting the majority of daily operations

THE SOLUTION:

A digital solution using WORK MANAGER and Mobile Forms:

Configurable forms tailored to specialised workflows

Real-time data capture with automated reporting

Central platform to manage services and operations

Give Your
Field Teams Real-Time Visibility
